

1993

What are the plans for 1993?

An advertising campaign for more staff will by the time you read this be already implemented. The view to attract more staff and increase broadcast hours.

We hope during the early month's of this year we can complete the introduction of the loan radio service to wards' four & five. A new style information card; to be left with the radio's in the lockers; is being drawn up at present. An effort to assist Gordon in modifying all the radio's, he has on stock, will be made.

The prize give away for each night, due to be introduced and promoted; In the hope that further sponsorship will materialise.

We will continue to press the hospital for more space.

It is unlikely that a car boot fair will take place this year for two reasons: -

- 1) The entrance to the field: has been blocked by a new path: complete with street lamps.
- 2) We are not going to spend our time this year organising the day, due to other commitments that are more pressing. We feel if the hospital wants a special day they will have organise something themselves. Failure by the hospital over the last two years to chip in with supporting the days was a contributing factor to this.

This is by no means, the only projects this year that will be tackled. We shall as the year progresses be looking for more ways in which we can promote the radio service and improve our facilities.

The development of the radio relies on the contribution we all make, as new staff arrive fresh ideas and commitment will determine our future.

Sweethearts Ball

Plans are well in hand for the sweetheart's ball on Friday, February 12. If you want some tickets: contact Tom or Roger, who will fill you in with the details.
