To: Radio Staff

The Radio Heatherwood staff newsletters took many styles and methods of production during its publications.

We have recreated an issue distributed by email to radio staff and also posted on the staff noticeboard.

This newsletter originally published as above date.

The only changes made to these emails have been the removal of personal phone numbers and email addresses.

Background Story to Email:-

Hi Guys

Some news for you.

New Presenters

Two more enquiries this week one via the web site. Will keep you posted on outcome.

Studio One Chilton

As some of you will realise I have repaired the mixer in studio one and in addition removed some of the background leakage from the radio tuner. There is still some there in your headphones but it is not as bad as it was. This mixer is now 14 years old and is suffering a bit from wear. The one item which wears out is the faders. These were specially made for the mixer. The current types do not have the same fixing centres or fader travel. The company that produced these faders no longer does so. I am trying to source an alternative, as long term the outcome could be we have to ditch the Chilton for a new mixer. I only have one spare mike fader now and 4 line input faders.

By the way I looked at trying to buy a new mixer this week equivalent to what we have, and the result we wouldn't get much change out of £5000.

Mikes Studio One

I re-wired these this week as well. All should be working ok.

Rhapsody

Next Saturday two trustee's from the Ascot Fire Brigade trust will be visiting the studio's for a demo. A meeting was held by them recently and the outcome is they want a demo. At this moment in time I have no idea how much they are going to support us.

Laraine is the only one who has volunteered to assist next Saturday. If you are a full presenter there is still time to volunteer !!!!!!!!!!!!!!!.

Air Cooler Reception

Please do not use this as we have a cleaning/smell problem to deal with.

Studio Heating

As you will see the hospital have turned on the heating. The water pipes running around all of the rooms ensures we are kept warm. If you turn up the taps on the radiators on your evening, make sure you return them to the low settings, otherwise other nights will arrive to find the studio's too hot to use.

That's all for now.

Regards

Peter J Davidson-Smith
