To: Radio Staff

The Radio Heatherwood staff newsletters took many styles and methods of production during its publications.

We have recreated an issue distributed by email to radio staff and also posted on the staff noticeboard.

This newsletter originally published as above date.

The only changes made to these emails have been the removal of personal phone numbers and email addresses.

Background Story to Email:-

Hi Guys

Some news about our meeting tonight

We were asked to attend a meeting with the director of services to hear about the patient power project.

The outcome in brief terms was an agreement to work more closely together on the introduction of the patient power terminals and to liaise over the messages which would be transmitted during our 24 hour service. A demo of the software will given to members of the hospital next week.

The requests we have made to the hospital are

- 1) Connection to the system
- 2) Can we have a terminal in the studio for training and contact from the patients.
- 3) What will be displayed on the terminal screen when patients listen to Radio heatherwood ? Will we have the opportunity to determine that picture.
- 4) Will patients have access to ring the studio ?

The news from them on the progress, is they hope to have some terminals up and running by Christmas. To be complete by April next year. They said that they are not going to turn it on until all the wards have been fitted out.

(Comment:- I think that's not going to happen the company will want to generate income as possible).

They intend to have staff on site all the time.

All wards will be covered including the emi and the new ward which they are putting in. By the way this will be known as ward 16 and will have 26 beds. The control room will be in a room behind the current theatres.

David & I were a bit worried about this meeting because of who was in attendance but it seems our hospital rep was in a state of panic and arranged the meeting thinking we were about to introduce something which is in competition to their patient power system.

Panic over

Lets see how this develops.

Regards
Peter J Davidson-Smith
