

Am Service Ward 8 Including Maternity unit Tuesday 1st April 1997

By the time you read this notice: Two new aerials today would have been installed on ward 8 to supplement the damaged aerials on ward 7. This improvement to the signal within the upper floors of the maternity unit should improve reception on the loan radios on ward 8 as well as re-enforcing signal on ward 7.

Please be aware the bedhead system on ward 8 is suffering from continuing hospital developments and side wards on here no longer pick up the 4 channels.

It is only a matter of time before the remaining service provided on the bedheads is turned off in the radio studio.

Promotion of the loan radios and all the normal checks carried out on the general wards should be re-enforced on ward 8.

Loan Radio Service users are your only listeners !

Ward 8 has 22 Loan Radios allocated to it, at present.

P.J. 29/03/97
