

Am Service
Cable Run 4

To All Presenters

The am service provided over cable run 4 from our transmitter will be disconnected today 13th June 1998 and will not be re-instated until sometime in July.

This is because of changes to the old special care baby unit this cable also provides services to the out-patients and x-ray dept's.

Disruption to our listeners we hope will be negligible.

When you check the transmitter the green led for 4 will be unlit. This should be the only one!!!!.
